## Drawings

The drawings have been approved.

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1-12,14-16,20-31,34-36,38-40 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Walker et al (3146971).

See windshield 42 and the plane goes at least mach .98.

## Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al in view of Chaumel et al (6213428).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the aircraft of Walker with radar as taught by 36 of Chaumel et al.

Application/Control Number: 10/681,790

Art Unit: 3644

1. Claims 13 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Walker et al in view of Fox (4741497).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to make the window of Walker et al out of plural sections as taught by Fox since it is a well known construction.

Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over
 Walker et al. in view of Rudolph (5529263).

It would have been obvious to one having ordinary skill in the art at the time the invention was made to use turbofans, canards and a waisted fuselage on Walker et al as taught by Rudolph since they are well known features of similar aircraft.

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Galen L Barefoot whose telephone number is 703-308-2567. The examiner can normally be reached on flex.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, charles Jordan can be reached on 703-306-4159. The fax phone number for the organization where this application or proceeding is assigned is 703-305-7687.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
